

Patient Statements & Patient Payments

A POWERFUL COMBINATION Our Statements Can Pay Themselves!

Offer your patients the ability to pay their statements online with a credit card or directly from their checking account by signing up for ENS Patient Statements with Patient Payments today.

Patient Statements and Patient Payments are vital to the revenue stream for most medical practices.

ENS' combination of patient-friendly electronic statements and electronic payment capabilities delivers the latest in e-billing technologies.

Combining and automating these key business functions will accelerate your revenue cycle and improve efficiency.

Effortless Patient Statements

With Electronic Patient Statements, statements go out on time, every time. It is as simple as sending an electronic claim. All you do is generate an electronic file, transmit it to us, sit back and wait for the checks to roll in.

ENS verifies patient addresses through the United States Postal Service's NCOA Link Service. The addresses are bar coded to ensure faster delivery of the statements and in turn, faster receipt of payments. This unique service delivers mail to patients who have moved and left a forwarding address with the United States Postal Service. Invalid addresses are suppressed and reported back to you at no charge. Once addresses are verified, each patient statement will be printed on attractive, high-grade stock, folded, stuffed, and mailed. Comprehensive reports are available via email or directly on our website that can notify you of file receipt, printing and mailing.

Key Features

- On time every time.
- Faster delivery.
- Suppress invalid addresses automatically.
- Forward to patient address changes automatically.
- Receive timely and detailed reports after file submission.

Option to pay online:
Provide patients with ability to view and pay statements on-line by entering statement id and password.

The Benefit of Combining Patient Statements & Patient Payments

- Provide patients with ability to view and pay statements on-line.
- Apply payments to open balances more quickly and view all open patient bills.
- Improve workflow and get real-time reporting on all receipts from all of your office locations.
- Automatically debit or charge pre-authorized patient balances – statements that can actually pay themselves!
- Remittance reporting that can enable you to automate the patient payment posting process.

Patient Payments

Key Features

- Ability to process online payment from anywhere any time.
- Obtain payment pre-authorization & set up payment plans with patients on future balances.
- Auto post/import payment detail into your accounting system.
- Eliminate returned checks
- Ability to view your statements online

The largest portion of your practice income is received from insurance payers – and the value of patient payment processing is often overlooked, despite the fact that the number of uninsured patients is rising. With the creation of the Health Savings Accounts (HSAs) and High Deductible Health Plans (HDHPs), your practice will be receiving more payments from patients in the form of HSA Credit/Debit Cards and checks. With ENS' credit card and electronic check processing application, providers can collect payment at the time of service through an internet browser. Processing can be done at any computer (back office, satellite office, billing office, or remote check out desk) without investing in expensive new hardware, software, terminals or phone lines. You can also obtain pre-payment authorization from patients on future balances. Real-time web reports on all collection activity from all locations/operations are also available to you. The ENS Patient Payment application can enable you to auto post/import detail into your accounting system, eliminating the time-consuming task of manual application of payments. ENS Patient Payments will enable you to improve collections, accelerate cash flow, reduce costs and realize even greater efficiency when combining it with ENS Patient Statements Service. You will see a dramatic improvement in your workflow.

Hurry, Limited Time Offer

Enroll for these services and ENS will waive all training costs!

Signing up for both or either one of these services is simple: just give us a call and we'll get you set up. Our sales staff can provide you with more information about any of our products.
